- quick release
- turnable bar ends
- make 4 length-options
- 4 and 5 line mode
- 4 safety modes
- turnable 5th line
- Autolock chickenloop
- suits all shapes

The new Switchcraft II is an allround bar. It is suitable for all types of kites thanks to the various possibilities to attach the safety line with its sophisticated leading through the system and a removable / upgradeable fifth line. With its revolutionary maximum safety Quickrelease, comfortable 3D grip and patented turnable bar horns, JN Switchcraft fits all riders' needs. The special turnable bar horns, realize the adjustment of 4 different bar sizes.

What makes the bar very comfortable during unhooked moves is the aluminium-coated oval that clicks into the bar hole. So the chickenloop is always perfectly positioned to hook back in. The sophisticated setup of the 5th line provides excellent safety standards at all times and setups and prevents the safety from twisting after kite loops or rotations.
